DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-9 are allowed.
- 2. The following is an examiner's statement of reasons for allowance: Independent claim 1 establishes the limitation of a frequency control circuit, which is active only upon start-up of the circuit arrangement, compares the reference signal and the output signal of the voltage-controlled oscillator divided down, as applied to the first phase detector, and controls the voltage-controlled oscillator in a predetermined frequency range around the reference frequency of the reference signal, in that, after reaching the predetermined frequency range, the frequency control circuit is deactivated and the output signal of the first detector is coupled to the loop filter. This limitation is neither disclosed nor suggested in Richards, Jr. (US Patent 5,507,024) or the further cited reference of Takahashi et al. (US Patent 4,096,360), Koo et al. (US Patent 5,432,855), and Green (US Patent 6,694,026).
- 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
